RUCHIRA PATIL

San Jose, CA • 857-222-2763 • ru91patil@gmail.com • linkedin.com/in/ruchirapatil

Product-minded Senior Full-Stack Software Engineer with 8+ years of experience leading end-to-end engineering initiatives across frontend, backend, and distributed infrastructure. Combines strong technical depth with product thinking to navigate ambiguous problems, drive architectural decisions, and deliver scalable, impactful solutions. Experienced in bridging engineering disciplines and collaborating cross-functionally to turn complex challenges into meaningful product outcomes.

TECHNICAL SKILLS

Frontend & Product: React, TypeScript, JavaScript, SDUI, Kotlin UI, SSR, SEO, A/B testing
Backend & APIs: Java, Play Framework, GraphQL, Kotlin, Node.js, Scala, Spring Boot, REST, Rest.li, D2, gRPC
Distributed Systems & Data: Kafka, Samza, HDFS, Venice, Couchbase, Espresso, DynamoDB, SQL, Trino
Cloud & Tooling: AWS, Lambda, Terraform, CloudFormation, Jenkins, OpenShift, KQL/Kusto, Splunk, Selenium, Jest

EXPERIENCE

Senior Full-Stack Software Engineer — Growth Org | LinkedIn | Sunnyvale, CA | May 2022 – Present

Notifications — Product Engineering & Distributed Systems

- Led the end-to-end migration of LinkedIn Notifications from the legacy stack to SDUI, driving cross-stack engineering across Java/GraphQL mid-tier APIs and Kotlin-based server-driven UI definitions, modernizing notification presentation across web, iOS, and Android.
- Led the full-stack rearchitecture of Notifications Settings, building reusable UI libraries and influencing product decisions across Edge, Mute, and USP preference models; partnered with Product, Design, and infrastructure teams to align member-facing controls with distributed settings enforcement and Samza backfill requirements, enabling clearer notification explanations, direct settings navigation, and simplified preference management.
- Led implementation of key Notifications features, including New Notification Pill, Reactive Tab Titles, and Infinite Loader, improving visibility and discovery of new notifications while enabling seamless browsing of in-app notifications.
- Designed and built a Notification Replay Tool enabling engineers and product partners to recreate personalized notification scenarios on test accounts without waiting for live triggers, streamlining reproduction, debugging, and validation across in-app, push, and email channels.
- Owned production reliability operations for LinkedIn's distributed communications platform, diagnosing notification throughput degradation across Kafka-backed nearline and offline pipelines using metrics, consumer lag, and event tracing; coordinated mitigation, verified end-to-end recovery, and implemented permanent fixes with regression coverage.
- Mentored new hires and interns on engineering projects and contributed to Women in Tech (WIT) and Women Who Code initiatives, supporting onboarding, technical development, and an inclusive engineering culture.

Growth — SEO, Acquisition & App Activation

- Built Content Hub and AI collaborative-article capabilities, expanding discoverable content and supporting organic-search acquisition.
- Evaluated ML relevance and ranking models for SEO crosslinking, improving engagement by 0.8%.
- Built guest app-activation experiences that increased guest-to-member conversion by 1.2%.
- Developed public-profile redesign and anti-scraping experiments, balancing search discovery, guest engagement, and content protection.

Senior Software Engineer | Citizens Bank | Johnston, RI | Nov 2019 – May 2022

- Architected a serverless Node.js and React onboarding platform integrating multiple applications and services; implemented Okta SSO and role-based authorization.
- Automated infrastructure provisioning, load balancing, autoscaling, and CI/CD using AWS, Terraform, CloudFormation, Jenkins, OpenShift, and CodeDeploy.

Software Engineer II | Asurion | Sterling, VA | Jul 2018 – Nov 2019

- Built Node.js REST APIs with AWS Lambda, API Gateway, and DynamoDB, plus React/Redux retail applications delivered through CloudFront; implemented Cognito and IAM controls.
- Integrated automated testing and deployment workflows with Jest, Jenkins, and the Serverless Framework.

Full Stack Developer | Zappix | Boston, MA | Mar 2018 – Jul 2018

- Delivered Visual IVR features and a healthcare analytics service using Node.js, AWS Lambda, API Gateway, SNS/SES, and RDS/MySQL.

Software Engineer Intern | Agero | Boston, MA | Jan 2017 – Sep 2017

- Developed .NET and JavaScript IVR APIs, migrated SOAP integrations to REST, built AWS data pipelines, and added Splunk observability dashboards.

Associate Software Engineer | Synechron Technologies | Pune, India | Dec 2013 – Dec 2015

- Built Java, Jenkins, and AngularJS test-execution dashboards and Java/Selenium automation; trained 15 engineers in Agile practices and test automation.

EDUCATION

M.S., Information Systems | Northeastern University | Boston, MA | Dec 2017

B.E., Electronics & Telecommunication | Pune University | Pune, India | May 2013
